

Final steps taken for the implementation of Thessaloniki Port's 6th Pier extension project

The contract for the Project Management of the 6th Pier Extension of Thessaloniki Port Infrastructure was signed yesterday, September 4th, between [OLTH SA](#) and HILL INTERNATIONAL N.V. – Rogan & Partners SA Consortium, for a significant project which is part of the mandatory investments program, totalling 180m euros, undertaken by OLTH SA and including the construction of:

- An additional pier with a length of 460 m. and 17.6 m. deep (minimum)
- An additional terrestrial zone, at least 300 meters wide, along with the above-mentioned new pier
- All additional infrastructure needed to ensure the full functionality of the new pier and the corresponding terrestrial zone

According to the contract, the duration of the project is set at 46 months and the Consortium will provide, under the supervision and final approval of OLTH SA, the following services:

- a) Preparation of the Final Study Plan, including the bidding documents for the tendering of the project and
- b) Project Management and supervision of the construction of the above project.
